*The information presented in this document is an analysis and summary of data provided to the New Mexico Public Education Department's STARS Data Warehouse by Local Education Agencies and Charter Schools. While the CIO Division monitors incoming data for completeness, the extent to which conclusions and generalizations can be drawn is dependent upon the accuracy of the information submitted to the warehouse.*

## **EXECUTIVE SUMMARY**

Like most states, New Mexico pursues programs and strategies to meet the needs of at-risk students and to address obstacles associated with keeping students in school. New Mexico schools continue to be challenged in obtaining resources required to keep students in school despite including an “at-risk” factor in the state’s funding formula to assist in addressing the issue. Additionally, dropouts affect the four year (freshman) cohort graduation rate for the state which results in a lower graduation rate.

Over the past three years, New Mexico has undertaken and implemented redesign of its high school education system. Although the results of the system redesign have yet to be fully realized and reported, some have begun to show immediate effect. For example, after the 2007 Dual Credit Rule and Master Agreement were established, students became aware of and enrolled in dual credit classes in record numbers. Participation in online learning or distance education has also shown record enrollment with the establishment of the statewide ‘cyber academy’ or IDEAL-NM (Innovative Digital Education and Learning – New Mexico). Data systems have been established and refined to annually produce continuing enrollment of ninth grade cohort groups. Career and technical education has a renewed focus on New Mexico’s seven career clusters. Staying in high school and earning a diploma has become a statewide focus.

To help students stay in school or become re-engaged, New Mexico invests resources in several intervention programs. Some examples are: the Governor’s Truancy/Dropout Prevention Program which is based on best-practice models and focuses on schools, children and families (including school staffs, truancy officers, juvenile justice, courts, counselors); the Family and Youth Resource Program which focuses on the non-academic issues facing families and students that stand in the way of student success; and coordinated after-school enrichment and school-based health care programs (including School-Based Health Centers) which provide physical and mental health to students.

The *New Mexico Dropout Report* is published annually by the Public Education Department. It includes information concerning student dropouts by subgroups as tracked by the U.S. Department of Education. It also includes information about the students’ reasons for dropping out of school.

### **OVERALL DROPOUT RATE FOR 2009 SCHOOL YEAR**

New Mexico’s overall 2009 number of dropouts increased from the previous school year by only 87 students. The statewide dropout rate was 3.8% for grades 7-12 in 2009, compared to 3.6% in 2008. The overall dropout rate for grades 7 and 8 increased by .8% for this group compared to 2008.

### **HIGH SCHOOL DROPOUT RATE DECREASES FOR 2009**

More students are staying in high school. The dropout rate for grades 9-12 decreased by .2% in 2009 compared to 2008 (4.9% in 2008 to 4.7% in 2009). Historically, tenth grade continues to have the largest number of dropouts and this stayed consistent for the 2009 school year. The table below summarizes the student enrollment (membership) and the dropouts from that population for the past three school years:

| GRADE | 07-08<br>Membership | 07-08<br>Dropouts | 07-08 Dropout<br>Rate | 09-12<br>Membership | 09-12<br>Dropouts | 09-12 Dropout<br>Rate |
|-------|---------------------|-------------------|-----------------------|---------------------|-------------------|-----------------------|
| 2009  | 49,509              | 1,041             | 2.1%                  | 102,578             | 4,804             | 4.7%                  |
| 2008  | 50,894              | 543               | 1.1%                  | 103,070             | 5,047             | 4.9%                  |
| 2007  | 50,720              | 797               | 1.6%                  | 100,134             | 5,832             | 5.8%                  |

## **INTRODUCTION**

The *New Mexico Dropout Report* is published annually by the Public Education Department (PED) to provide education system constituents with information concerning who drops out of school and their reasons. For the 2008-09 school year, PED used a dropout rate calculation established in 2006 by the state for school district report cards (NMAC 6.30.2.10 K. (2) (c)).

In order to keep students in school, New Mexico districts and schools actively pursue programs focused on addressing the academic needs of at-risk students and building capacity of truancy intervention programs. In addition, some school districts have established agreements with outside agencies to jointly provide for the educational and social needs of students who are at risk of dropping out. Even with these efforts, schools continue to be challenged to have adequate resources for meeting the needs of at-risk students. The 1997 legislature revised the State Equalization Guaranteed (SEG) funding formula to include an at-risk factor as part of the formula calculation, but overall school budgets are stretched. Current proposed revisions to the school funding formula continue to include an “at risk” index in the funding calculation.

PED’s Student Teacher Accountability Reporting System (STARS) houses student demographic data submitted by districts which was used in analyzing the student subgroups. Demographic data was obtained from “Student Snapshot” and “Membership” (school cumulative enrollment between the first and last days of the school year) from records stored in STARS.

## **METHODOLOGY**

Dropout rates are computed using New Mexico-specific statistical procedures, which are calculated by dividing the number of dropouts for the school between the first and last days of school plus summer dropouts (not including transition grades, e.g., summer dropouts between 8<sup>th</sup> and 9<sup>th</sup> grades are not attributed to four-year high schools) by the school cumulative enrollment between the first and last days of school.

Dropout statistics report the number of students dropping out in a given school year and students who attended school throughout the 2008 school year but are “no shows” during the entire 2009 school year. Student membership is collected and reported at the school, district, and state level, including the number of pupils in each of several categories from grades K (kindergarten) through 12 (twelve). Dropout data and rates are calculated only for grades 7-12.

A student is considered a dropout if he or she was enrolled at any time during the previous school year, is not enrolled at the beginning of the current school year, and does not meet certain exclusionary conditions. This means that, students dropping out during the regular school term in year one, who are not in membership on October 1 of year two, are reported as year one dropouts on

the dropout report in year two. For example, a student dropping out of tenth grade in March 2009, who is not in membership (enrolled) on October 1, 2009, is a 2009 tenth grade dropout.

A variety of sources were utilized to collect the data:

- Initially, districts produced a report of potential dropouts from STARS and submitted final dropout listings to PED.
- The Assessment and Accountability Division supplied data related to students that took and/or passed the GED.
- The Information Technology (IT) and Charter School Divisions supplied data on Home Schooled students.
- The IT Division supplied student membership and demographic data from the Student Teacher Accountability and Reporting System (STARS).
- Dropout students found in STARS at different schools at a later date than reported are attributed to the district and school last attended.
- Students thought to have dropped out but were found elsewhere in STARS for the current school year or who graduated in 2009 are identified and eliminated from the listing.

### ***Processing of the Data***

The first step of processing the data is to remove from the list students who were identified as dropouts that meet any one of the following criteria:

| <b>CRITERIA</b>  | <b>MEASURE</b>   |
|--|--|
| Passed the GED.  | Based on matching Date-of-Birth, First Name and Last Name.                           |
| Home Schooled.   | Based on matching District Code, First Name and Last Name.                           |
| Duplicates within a District.  | Based on matching Student ID, District Code, School Code and the Last Date Attended. |
| Duplicates across Districts.   | Based on matching Student ID, District Code, School Code and the Last Date Attended. |
| Enrolled in a different District at the End-of-the-Year.                     | Based on matching Student ID.  |
| Enrolled in a different District of the current (2009-10) School Year.       | Based on matching Student ID.  |
| Found to have graduated at the end or during summer of the 2009 school year. | Based on matching Student ID.  |

### ***Summary of Data Collection Method***

To publish the *2008-09 New Mexico Dropout Report*, districts produced listings of *potential* dropouts from data resident in the Student Teacher Accountability System (STARS) for the 2008 and 2009 school years. Between December 2009 and January 2010, district administrators reported final dropout listings to the PED. Charter Schools' data was submitted either via their oversight districts or directly to PED. Statewide summary data by ethnicity, gender, and grade level can be found in various tables within the report. The accuracy of the data is dependent upon the precision of local record keeping and reporting practices.

## ***Data Collection Categories***

Ethnicity is a self-reported or observed classification and not an exact description. The following racial/ethnic categories are used to describe membership groups:

- American Indian /Alaskan Native (I)
- Asian /Pacific Islander (A)
- Black, Non Hispanic (B)
- Caucasian, Non Hispanic (C)
- Hispanic (H)

United States Department of Education (USDE) also collects dropout statistics for other targeted student populations: gender, English language learners (ELL students), free & reduced meal recipients, migrants, and homeless students.

In New Mexico, when students are preparing to leave school, school authorities question them (if possible) about their reason(s) for doing so. This information is recorded on transfer sheets, stored, and later compiled for district use and for state and federal level reporting. When students leave school without notification or official permission, records are completed by school personnel. In many of these cases, accurate information about leaving school is not available. Although attempts are made to locate students, neither the time nor the resources are available with which to follow up on every student dropout.

## Dropout Calculation Method

The 2008-09 school year calculation is as follows:

- 2009 Dropout Rate = Number of Dropouts divided by the *CUMULATIVE* membership x 100

$$3.8\% = 5,845 / 152,087 * 100$$

- 5,845 is the total number of dropouts reported. 152,087 is the cumulative total enrollment for grades 07-12 for the 2009 school year.
