

## New Mexico Educational Technology Guidance

PARCC states have committed to building a K–12 assessment system that:

- Builds a pathway to college and career readiness for all students
- Creates high-quality assessments that measure the full range of the Common Core State Standards
- Supports educators in the classroom
- Makes better use of technology in assessments
- Advances accountability at all levels

In the 2014–2015 school year the current Mathematics and English Language Arts/Literacy components of the Standards Based Assessment (SBA) will be replaced by accountability assessments developed by the Partnership for Assessment of Readiness for College and Careers (PARCC). New Mexico is a governing state within the 23 member PARCC consortium, one of two national consortia, funded by the U.S. Department of Education to develop next generation student assessment systems. The PARCC assessments, which will be provided on a computer-based platform to students in grades 3–11, will inform students, educators, policymakers, and the public whether New Mexico students are on track toward college and or career readiness based on the Common Core State Standards, which were adopted in the Fall of 2010.

The New Mexico Public Education Department (PED) recognizes that local schools and districts are taking necessary steps to support computer-based assessments and trying to meet technology needs for instruction in a 21<sup>st</sup> century learning environment. As a PARCC partnership state, the PED has utilized the *Technology Readiness Tool* (TRT) to capture district and school self-reported data. The TRT reports will provide local education agencies a current status of local technology capabilities compared to the technology requirements required for computer-based assessments.

The PED  
Technology  
Guidance

## Check Your Readiness!

NMPED is asking schools and districts to use the *Technology Readiness Tool (TRT)* to determine readiness for computer-based testing and informed planning. The TRT is a web-based survey launched by two national assessment consortia: PARCC and Smarter Balanced. It is designed to:

- Survey current technology capacity and infrastructure in each school building across the country
- Serve as an inventory of current equipment
- Be updated by schools and/or districts as inventories and technologies change
- Show a gap analysis between school-entered data and requirements for the tests prepared by the consortia

Schools can enter and update technology data at:

<http://www.techreadiness.net>

## Use of Title I, Part A Funded Computers for State Assessments

The United States Department of Education (USED) confirms that an LEA may use computers purchased with Title I, Part A funds for non-Title I activities for incidental use, as long as the use does not interfere with Title I programming, increase additional cost to the Title I program, or significantly shorten the lifespan of the technology. In general, the USED recognizes that the definition of incidental use extends to helping administer the state assessment system.

## Computer Skills for PARCC

Computer literacy is becoming progressively more important in both instruction and assessment. As schools increase investments in technology resources (Examples: electronic textbooks, on-line programs, education software, and computer-based testing) providing students with opportunities to develop and use computer skills should be an essential part of learning. Keyboarding is a foundational skill closely related to motor skills. An ideal aim for 21<sup>st</sup> century learners is to be competent in keyboarding. However, it should be left to local schools to determine the appropriate age at which keyboarding instruction begins. It is not the intent of the PED to prescribe the specific grade level in which computer literacy skills should be taught. PARCC sample assessment prototypes provide exemplars of the types of computer skills students will need for the PARCC assessments. These prototypes can be found at:

<http://www.parcconline.org/samples/item-task-prototypes>

## Device to Student Ratio

|   |                     |
|---|---------------------|
| Minimum assessment student to device ratio    | 5:1                 |
| Minimum instructional student to device ratio | Local determination |

The minimum student to device ratio for PARCC testing will be 5:1. This ratio indicates that a single device should be able to facilitate five students taking the PARCC assessments, given the anticipated PARCC assessment window. However, student to device ratios for instruction should be locally determined.

## PARCC Compatibility

PARCC aims to use the same technologies for assessment that are regularly used for student instruction. PARCC will be a computer-based assessment. Current PARCC compatible devices include: desktops, netbooks, and tablets. iPads-V.2 and later with iOS6X installed will support PARCC assessments. Devices such as iPad Minis, Nooks, and Kindles cannot be used for PARCC assessments because the screen size is too small. The PED recommends that schools purchase devices for instructional use as the PARCC platform will aim to conform to the consumer demands of instruction. In making technology purchasing decisions, schools may want to take into consideration the *Technology Guidelines for PARCC Assessments* starting on page 4.

The next 4 pages provide the *Technology Guidelines for the PARCC Assessments*.

## TECHNOLOGY GUIDELINES FOR PARCC ASSESSMENTS VERSION 2.0 – DECEMBER 2012

Current updates and additional information are available at:  
**<http://www.parcconline.org/technology>**

The Partnership for the Assessment of Readiness for College and Careers (PARCC) is pleased to provide these technology guidelines to inform schools and districts as they make technology decisions to best meet the instructional needs of their students. The information in this document is intended to answer questions about whether existing computer inventories and new instructional hardware that schools may purchase as they implement the Common Core States Standards, will also meet PARCC's 2014-15 requirements for the online test.

*Technology Guidelines for PARCC Assessments Version 2.0* refines, and therefore supersedes, the Version 1.0 document previously released in April 2012.

### **This document provides two sets of guidance regarding technical specifications:**

#### **Minimum Specifications**

Minimum Specifications address the oldest operating systems and lowest levels of hardware capacity that can reasonably be compatible with PARCC computer-based assessments in 2014-2015.

- Minimum Specifications apply to existing school technology inventories.
- Computers meeting the Minimum Specifications can be considered as satisfying PARCC guidelines for **2014-2015**.

Considerations regarding computers meeting, but not exceeding, minimum specifications:

- Computers with these minimum specifications may not be adequate beyond the second year of PARCC assessments in **2015-2016**. PARCC recommends that schools upgrade or replace computers with older operating systems and lower memory capacities to Recommended Specifications levels as soon as possible.
- Computers that meet only the Minimum Specifications will be compatible with the PARCC assessment delivery platform, but are more likely to experience slower performance than higher capacity computers.

#### **Recommended Specifications**

Recommended Specifications outline the levels of computer and network capacity that are more likely to meet growing demands for school technology that supports learning, assessment, and administrative uses simultaneously across classrooms.

- Recommended Specifications apply to both existing inventory and new hardware purchases.
- Computers meeting the Recommended Specifications can be expected to satisfy PARCC guidelines through the **2018-2019** school year.

## TECHNOLOGY GUIDANCE FOR DECISION MAKING

While the ongoing processes for assessment and technical platform design continues, *Technology Guidelines for PARCC Assessments Version 2.0* **is intended to help states and districts inform their own readiness preparations and decision-making.** As test components are piloted through Item Tryouts in 2013 and Field Testing in Spring 2014, PARCC will supplement the guidance in this document to reflect current knowledge about what states will need to administer PARCC’s computer based assessment components. The most current version of this document and most up-to-date information is maintained at <http://www.parcconline.org/technology>.

### BANDWIDTH RECOMMENDATIONS

Minimum bandwidth requirements will be determined based on the final selection of the PARCC assessment delivery platform and the level of multimedia and technology enhanced items in the final assessment design. PARCC will provide minimum specifications by October 2013.

As schools plan for PARCC assessments concurrent with enhancing bandwidth to support instructional needs, PARCC is modeling recommended specifications on those advanced by the State Educational Technology Directors Association in its May 2012 publication *The Broadband Imperative: Recommendations to Address K-12 Education Infrastructure Needs* (<http://www.setda.org>).

|                                     | Minimum Specifications           | Recommended Specifications      |
|-------------------------------------|----------------------------------|---------------------------------|
| External Connection to the Internet | To be determined by October 2013 | 100 Kbps per student or faster  |
| Internal School Network             | To be determined by October 2013 | 1000 Kbps per student or faster |

### SECURITY REQUIREMENTS

Eligible devices of any type (desktop, laptop, netbook, tablet, thin client) or operating system (Windows, Mac, Linux, iOS, Android, Chrome) must have the administrative tools and capabilities to “lock down” the device to temporarily disable features, functionalities, and applications that could present a security risk during test administration, and should not prevent a PARCC secure browser or other test software to be determined from entering the computer into lock down mode. Features that will need to be controlled during test administration include, but are not limited to, unrestricted Internet access, cameras (still and video), screen capture (live and recorded), email, instant messaging, Bluetooth connections, application switching, and printing.

The operating systems listed here as approved for PARCC assessments meet this security requirement, but provide different mechanisms for managing user security settings at the individual device and/or enterprise levels. School technology administrators should be familiar with the particular requirements of the systems they will be using for PARCC assessments to ensure test security is maintained.

### TESTING PLATFORM SOFTWARE / WEB BROWSER REQUIREMENTS

Software and/or browser requirements will be defined by October 2013, driven by the design choices for test items and the assessment delivery platform.

### DEVICE SPECIFICATIONS

Desktops, laptops, netbooks (Windows, Mac, Chrome, Linux), thin client, and tablets (iPad, Windows, and Android) will be compatible devices provided they meet the established hardware, operating system, and networking specifications—and are able to address the security requirements described in the Security Considerations section of the Guidelines.

## Desktop, Laptop, Netbook, and Thin Client<sup>1</sup>/VDI Computers

| Operating System                               | Minimum Specifications <sup>2</sup>  | Recommended Specifications  |
|--|--|---|
| Windows  | <sup>3</sup> Windows XP– Service Pack 3  | Windows 7 or newer  |
| Mac OS   | Mac OS 10.5  | Mac OS 10.7 or newer  |
| Linux  | Ubuntu 9-10, Fedora 6  | Linux: Ubuntu 11.10, Fedora 16 or newer   |
| Chrome OS                                      | Chrome OS 19   | Chrome OS 19 or newer   |
| Memory   | 512 MB of RAM  | 1 GB RAM or greater   |
| Connectivity                                   | Computers must be able to connect to the Internet via wired or wireless networks.  | Computers must be able to connect to the Internet via wired or wireless networks. |
| Screen Size                                    | 9.5 inch screen size or larger   | 9.5 inch screen size or larger  |
| Screen Resolution                              | 1024 x 768 resolution <sup>4</sup> or better   | 1024 x 768 resolution <sup>4</sup> or better                                      |
| Input Device Requirements                      | Keyboard   | Keyboard  |
|  | Mouse/Touchpad   | Mouse/Touchpad  |
|  | <p>The input device must allow students to control an onscreen cursor to point, click, drag, and select an area. The input device must allow students to enter letters, numbers, and symbols and shift, tab, return, and backspace.</p> <p>Other assistive technologies may be needed for students requiring accommodations. PARCC will release Accessibility Guidelines and Accommodations Guidelines in June 2013.</p>   |   |
| Headphone/Earphone and Microphone Requirements | Headphones/Earphones   | Headphones/Earphones  |
|  | Microphone   | Microphone  |
|  | <p>Headphones/earphones and microphones are required for all students taking the English Language Arts/Literacy Speaking and Listening Assessment.</p> <p>Headphones/earphones are required for students using text to speech or other auditory accommodations.</p> <p>Microphones are required for students using speech to text accommodations.</p>  |   |
| Additional Guidance                            | <p><sup>1</sup>Each computer operating in a thin client environment must meet or exceed minimum hardware specifications, as well as bandwidth and security requirements.</p> <p><sup>2</sup> Computers meeting only the minimum specifications for the 2014-2015 assessment are not likely to be compatible beyond the 2015-2016 assessment. PARCC recommends that schools upgrade from the oldest operating systems and lowest memory levels as soon as possible.</p> <p><sup>3</sup>Windows XP will no longer be supported by Microsoft after April 8, 2014, presenting both security and support risks for schools. (<a href="http://windows.microsoft.com/en-US/windows/end-support-help">http://windows.microsoft.com/en-US/windows/end-support-help</a>)</p> <p><sup>4</sup>Computers running Windows XP-Service Pack 3 may require a web browser other than Internet Explorer due to HTML5 compatibility limitations. PARCC will issue specific web browser guidance by October 2013.</p> <p><sup>5</sup>Computers must accommodate the 1024 x 768 screen resolution minimum specification without panning.</p> |   |

## Tablets

| Operating System                               | Minimum Specifications  | Recommended Specifications  |
|--|---|---|
| Android  | Android 4.0   | Android 4.0 or newer  |
| Apple iOS                                      | iPad 2 running iOS 6  | iPad 2 or newer running iOS6 or newer   |
| Windows  | 6Windows 8  | 6Windows 8 or newer   |
| Memory   | 1 GB RAM  | 1 GB RAM or greater   |
| Connectivity                                   | Computers must be able to connect to the Internet via wired or wireless networks.   | Computers must be able to connect to the Internet via wired or wireless networks. |
| Screen Size                                    | 9.5 inch screen size or larger  | 9.5 inch screen size or larger  |
| Screen Resolution                              | 1024 x 768 resolution <sup>4</sup> or better  | 1024 x 768 resolution <sup>4</sup> or better                                      |
| Input Device Requirements                      | Keyboard  | Keyboard  |
|  | Mouse/Touchpad  | Mouse/Touchpad  |
|  | <p>Due to the onscreen space occupied by a tablet's virtual keyboard, PARCC is strongly recommending that schools be prepared to provide external keyboards for test takers using tablets so as not to limit or obscure the view of test item content and related functionalities when text input is required. Research studies to be conducted by PARCC in Spring 2013 are intended to yield data on student's use of virtual versus external keyboards. PARCC will refine this guidance as needed based on these results.</p> <p>External keyboards must allow students to enter letters, numbers, and symbols and shift, tab, return, and backspace. Tablet touch screen interfaces can be used for student interactions with the assessments other than text input, including to control an onscreen cursor to point, click, drag, and select an area.</p> <p>Other assistive technologies may be needed for students requiring accommodations. PARCC will release Accessibility Guidelines and Accommodations Guidelines in June 2013.</p> |   |
| Headphone/Earphone and Microphone Requirements | Headphones/Earphones  | Headphones/Earphones  |
|  | Microphone  | Microphone  |
|  | <p>Headphones/earphones and microphones are required for all students taking the English Language Arts/Literacy Speaking and Listening Assessment.</p> <p>Headphones/earphones are required for students using text to speech or other auditory accommodations.</p> <p>Microphones are required for students using speech to text accommodations.</p>   |   |
| Additional Guidance                            | <p><sup>6</sup>PARCC has not yet evaluated the compatibility of Windows RT for 2014-2015. Further information will be issued on Windows RT in Version 3.0 of the PARCC Guidelines.</p> <p><sup>7</sup>Smaller tablets (screen size less than 9.5"), e-readers, and smart phones will <u>not be supported</u> and will <u>not be compatible</u> with PARCC assessments for 2014-2015.</p>  |   |
